

Muskie will scare swimmers out of the water. Why stock fish that will be a detriment for the many small children and grandchildren to swim or play in the water.

Property owners work hard to have a nice beach only to have its use eliminated at the sighting of a monster Muskie.

The DNR should not create and enhance a danger for the benefit of a very small group of fishermen at the expense of a super large majority of swimmers.

Muskies have been in our swimming area – luckily at a time when they weren't spotted by my grandchildren.

I know my grandchildren -- once they see a Muskie in the swimming area they will no longer be in the water. What a shame destroying it for many, just so a few Muskie fisherman can benefit.
